ISMF INTEGRATED SAFETY MONITORING FILTER

ADVANTAGES

- Lower need for additional make-up air
- Improves overall filtration efficiency of the dust collector
- Independently tested flame barrier
- Allows recirculation of cleaned process air with a high degree of safety
- By returning the air energy costs are reduced

Application	An ISMF filter works as flame barrier for ST1 metal dust and up to ST2 for organic dust.
Installation Options	 - ISMF filters can be configured to Camfil's Gold Series or Gold Series X-Flo dry dust collectors. - Due to Camfil's modular concept, ISMF filters can be retrofitted to existing units.
